President's Message

Welcome to the SA Forum Newsletter! The SA Forum has a lot of exciting activity planned for 2007 and we'll keep you informed with this quarterly newsletter.

As the newly elected SA Forum president for 2007, I am looking forward to a productive year with the SA Forum. We've begun the year with the release of our newly enhanced specifications. These enhancements make it easier for users to implement the specifications while maintaining backwards compatibility. Throughout 2007, we plan to add additional capabilities such as software management and Java extensions.

This year, we are also kicking off an education program that will make it easier for you to learn more about our specifications and implementation. We will also be showcasing the ever-increasing number of SA Forum solutions available on the market.

I look forward to working with all of you throughout the year.

Asif Naseem
SA Forum President
anaseem@goahead.com

Enhanced SA Forum Specifications – Now Available!

The SA Forum has announced the release of newly enhanced specifications: Application Interface Specification (AIS) B.03 and Hardware Platform Interface (HPI) B.02. The new specifications include added services and functional updates, and offer a richer set of features for both AIS and HPI, while maintaining backwards compatibility with previous SA Forum specifications. These enhancements have been developed by SA Forum member companies with input from the community of implementers.

To learn more about the new specifications, please visit <http://www.saforum.org/specification/>.
Download AIS B.03 and HPI B.02: <http://www.saforum.org/specification/download/>

New - SA Forum Products Page

Find the latest "SA Forum Solutions" on the new Product Page! This Web page features information about products from companies that utilize SA Forum specifications. You'll find products from Augmentix, Fujitsu Siemens Computers, GoAhead Software, HP, IBM, Intel, Nortel, OpenClovis, and Sun Microsystems. Check back as companies continue to add products to this

listing.

SA Forum Education Opportunities

Make plans now to attend this SA Forum tutorial, being held in conjunction with ISAS and the SA Forum members meeting. This afternoon event will introduce the principles of High Availability design and show how these principles can be applied for the development and maintenance of systems.

Tutorial: [Principles of HA Design for Planners](#)

Presenter: András Kövi, Budapest University of Technology Economics, Hungary

Date: May 22, 2007

Time: 3:30 – 7:00 pm

Following International Service Availability Symposium (ISAS) 2007

Location: University of New Hampshire, Durham, New Hampshire, USA

Upcoming SA Forum Events

International Service Availability Symposium (ISAS) 2007

University of New Hampshire
Durham, New Hampshire, USA
May 21-22, 2007

The Service Availability Forum™ will host the fourth annual International Service Availability Symposium at the University of New Hampshire, May 21-22, 2007. The objective of ISAS 2007 is to bring together researchers and practitioners from different “service” related areas within both industry and academia. Individuals are especially encouraged to submit original papers addressing problems of service availability at all layers.

For more information, please visit the SA Forum [ISAS 2007](#) page.
